

Hyaluron Active™ Range

Complete fragrance free skincare range for sensitive skin formulated to deeply hydrate and plump the skin, making it ideal for moisture loss, restores its youthfulness, and firms it.

Hyaluron Active™ Eye Cream

Hyaluron Active™ Serum

Hyaluron Active™ Cream

Key Customer:

- For individuals with dry skin or struggling with a compromised skin barrier, this range is their go-to. Especially beneficial during colder months or after sun exposure, Hyaluronic Active™ replenishes and soothes your skin.
- Men and women aged 25+ who are starting to notice early signs of aging and are seeking hydration-focused skincare to help maintain a plump, smooth, and radiant complexion.

Tip: When our skin's natural levels of hyaluronic acid decline, it can result in dryness, fine lines, and a lack of radiance. The Hyaluron Active range works as a skin moisture booster, helping to restore hydration, improve skin smoothness, and revive a healthy glow.

Hyaluron Active™ Eye Cream

Hyaluronic Eye™ Cream is a fragrance-free eye cream, with fine molecular hyaluronic acid and jojoba oil that instantly re-hydrates and soothes the delicate eye area for a visible anti-wrinkle effect

Key Selling Points:

- Soothes the delicate eye area
- Fragrance free
- Softens and soothes dry skin, preventing flakiness
- Brightens and illuminates the skin, making it an excellent choice for the often-darkened skin around the eyes
- Packed with skin-protecting antioxidants

EFFECT | Fragrance-free, rejuvenating eye cream

BENEFITS | Intensely moisturising formula containing jojoba oil and hyaluronic acid

Key Ingredients:

Jojoba oil: Reduction of TEWL: Transepidermal water loss, Softens the skin while caring for dry eye areas.

Hyaluronic Acid: Delivers long term moisturising benefits by carry 5x its water binding capacity of normal hyaluronic acid.

Pentylene Glycol: Humectant; aids in penetration of other ingredients.

Glycerin: Skin protectant, Moisturizing, Reduction of TEWL, Anti-irritant, Soothing (TEWL: Transepidermal water loss)

Hydrolyzed Hyaluronic Acid: Smaller molecular size enables deep skin penetration, attracting and retaining moisture at a cellular level.

Application

Apply morning and evening to the skin around the eyes. Ideal for use in combination with other products from the Hyaluronic Active™ series.

Hyaluron Active™ Serum

Hyaluronic Active™ Cream is a fragrance-free day to night moisturiser with fine molecular hyaluronic acid for intense rehydration, improved skin elasticity and a visible anti-wrinkle effect.

Key Selling Points:

- Anti-inflammatory and soothing to premature ageing
- Soothes sensitive, irritated skin and protects against environmental stress
- Absorbs sweat and sebum for a matte appearance
- Improves skin appearance by reducing dark spots and redness

EFFECT | Moisturizes the skin, reduces visible signs of aging, and makes the skin smoother.

BENEFITS | Suitable for both day and night use

Key Ingredients:

Sodium Hyaluronate Crosspolymer (Hyaluronic Acid): Delivers long term moisturising benefits by carry 5x its water binding capacity of normal hyaluronic acid.

Pentylene Glycol: Humectant; aids in penetration of other ingredients.

Hydrolyzed Hyaluronic Acid: smaller molecular size enables deep skin penetration, attracting and retaining moisture at a cellular level.

Sodium Hyaluronate: Moisturises the skin, reduces appearance of wrinkles, sebum reduction and reduces skin oiliness.

Application

Apply the serum morning and evening to cleansed skin, using a generous amount. Gently massage it into the skin using circular movements until fully absorbed. Follow up with the Hyaluron Active™ Cream.

Tip: Serums have lightweight formula that allows them to be absorb quickly and deliver active ingredients deeper into the skin. For optimal results, followed by applying a cream to seal in hydration and protect the skin barrier.
